

RoHS-compliant

1-Port Serial Server

■ ■ SE5001

Features

- Cigarette pack size
- Rugged metal case with wall/DIN-Rail mount
- Watch Dog Timer 1.34 sec. hardware auto reset
- 15KV ESD protection for serial signals
- 10/100Mbps Fast Ethernet full duplex auto negotiation
- Support TCP server/client, UDP for Virtual COM mode and Tunneling mode
- Monitor, manage and control industrial field devices remotely
- Configuration: Web Server page/Serial Console/ Telnet Console
- Monitor IP configuration utility for Windows
- Upgrade firmware from remote-PC via Ethernet
- Programmable with built-in C software development kit
- Redundant dual DC power input for non-stop operation

Make Serial Devices Ready to the Network

The Industrial Serial Server SE5001 is a cost effective gateway between Ethernet (TCP/IP) and serial signal communications. It allows almost any serial device to be connected to a new or existing Ethernet network.

By encapsulating serial data and transporting it over Ethernet, SE5001 offers full-duplex, bi-directional data transmission transparent between serial port and Ethernet network.

Easy to Use

Flexible configuration options enable this unit to be setup over Ethernet by Telnet, Web browser, Serial Console, or other Windows utilities. Packed in a rugged metal housing for wall or DIN-Rail mount with 5~30VDC wide power input range, SE5001 is ideal for almost any industrial and manufacturing automation.

ATOP Virtual COM software provides existing Windows based application to access serial device by mapping to remote serial server via Ethernet.

Specially Designed for Automation Fields

In industrial and manufacturing automation fields, SE5001 is used as a field device to connect Ethernet through TCP/IP protocol directly. It is also specially designed for conjunction with PLCs, HMIs, Barcode Scanners, Data Terminals, Electronic Kanbans, Shop Floor Control Systems, and Pick-to-Light Systems.
